DocuCentre-IV 5070 / 4070

Digital Black and White Multifunction Device

Productivity, flexibility and simplicity

Simplicity in design

Fast copying and printing and advanced scanning and faxing. The modular and easy-to-manage DocuCentre-IV 5070 / 4070 multifunction devices are packed with high-end features to deliver a level of productivity above and beyond your typical office MFD.

With fast deployment and easy support, your device is ready to deliver the performance you need, when you need it. Helpful tools make it easy to maintain complete control — allowing you to keep costs to a minimum.

Features at a glance

- Print and copy speeds of up to 45 / 55 ppm to keep up with even the busiest environments
- Improve the way you work with full colour scanning
- Fax solutions available, including Walk-up, Internet Fax and IP Faxing
- Innovative 8.5-inch, colour user interface

Security at every level

Secure Print helps prevent unauthorised viewers from seeing documents by holding jobs in the print queue until the user is authenticated.

Image Overwrite security feature clears or “overwrites” all trace of any document image data remaining on the hard drive after a print, copy, scan or fax job (when enabled).

Hard disk encryption helps ensure that unauthorised users can’t access stored documents.

IPv6 support includes full enablement of the new IPSec standard.

An internal firewall provides an additional measure of security, providing IP filtering, domain filtering and port blocking.

Network authentication restricts access to scan, email and network fax features by validating user names and passwords before use. Audit Log capabilities let you know who sent what, when.

Dramatically increase your workflow efficiency. Cutting-edge scanning functionality opens the door to better ways of getting work done. Scan to Email quickly distributes documents to multiple email addresses. Store files on the device, or in a personal directory. You can also scan documents to network folders, FTP sites and fax servers right from the device.

Easy archiving, organising and searching. With scan to searchable PDF*, you can create a fully text-searchable file and integrate it into your workflow process in one easy step.

*Optional Searchable PDF Kit is required

Significantly smaller scan files. The latest scan-export compression technologies reduce traffic on the network and accelerate document delivery.

The speed you need. With ultra-fast copying and printing — choose from 45 ppm up to 55 ppm — there's more than enough speed to meet the needs of any busy department or workgroup.

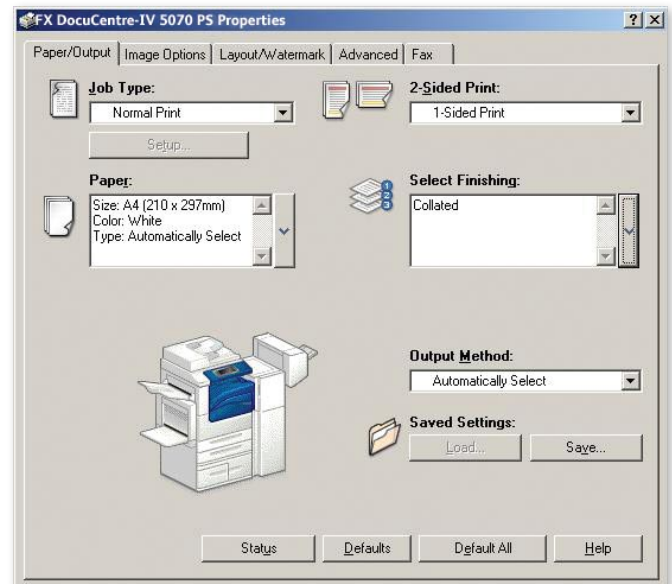

Multitasking mastery. Scan a job while another job prints. Send a fax while making copies. The powerful 1.2 GHz Freescale processor concurrently processes all jobs received, and performs multiple tasks simultaneously.

Walk-up simplicity. Print from and scan to any USB memory device for faster document delivery when you're not at your computer.

8.5-inch, colour touch screen interface. Provides the comfortable look and feel Fuji Xerox is known for and features bright, intuitive icons and easy access to all major functions directly from the home screen.

Advanced copy and print features. Plenty of support for specialised print applications, such as Annotation, Bates Stamping, ID Card Copy and tab print capability.

WHQL certified PCL and PostScript print drivers* provide a consistent, easy-to-use interface for end-users that can greatly simplify your printing operations.

*WHQL certified drivers will be available from the end of August 2011.

Extensive fax capabilities. Network server fax enablement, Internet fax enablement (to avoid long distance charges), walk-up fax with LAN fax and IP faxing. With fax forward to email feature, incoming faxes can be automatically routed to any valid email address, device folder or network folder to save paper and speed retrieval.
